

ATTACHMENT C Alfredo José Munguambe

This is a story about a young man and his dream to change the destiny of his family.

A letter from Alfredo:

"My name is Alfredo José Munguambe and I am 18 years old.

I live with my parents and my three siblings in a house with two bedrooms and a living room. The conditions are not favourable for me to continue my studies. Thanks to God, I managed to complete my 12th grade, and I am a young man very passionate about learning new things. I would not like my studies to end at 12th grade so I would like to be able to enter a university and receive an education.

I enjoy practicing capoeira, going to church, respecting others, and being an example in society. The course I would like to pursue is Mining Engineering in the province of

Tete.

I want to study Mining Engineering because it's a way for me to change my life and help my family. Growing up in Mozambique, I've seen how important mining is for our country and how it can create jobs and opportunities. With this degree, I hope to get a good job, support my family, and show other young people like me that education can open doors. My dream is to not only build a better future for myself but also to help my community and be part of Mozambique's growth."

WE responded to this cry for help and provided with his registration, enrolment and transport to the University in the North of Mozambique in Tete.

Alfredo in front of the University building where he will be studying.

March 2026 - It is going well at University, and the place where he lives cannot be compared a bit to our university residences. Just look at the first few pictures and you will

understand, but he is happy and grateful to be there. We still need ongoing funds to support him for the year and our hearts are overflowing with gratitude towards Jim and Brigitte Eliot who is so faithful in their commitment towards supporting Alfredo .

*Alfredo's hostel and room
(Yes he is sleeping on the floor with 3 other students in the same room)*

May 2026 – A letter from Alfredo

"Good afternoon, I hope you are all in good health. Well, first of all I want to thank those who support me in my studies, I am very grateful indeed. As for my studies, they are going very well, I am making the most of them, being in my third month there I think I am getting more and more used to living alone which is not easy at all, having to go to college and come back thinking about what to cook but I am getting more and more used to it. I continue fighting with my studies until I reach my goals to make those who help me proud and my family to be a mirror for society.

Thank you very much 😊 Alfredo José Munguambe"
